5. Team
6. Call to action

Web3 has prompted a paradigm shift from a centralized internet to a decentralized digital world. Its value proposition includes decentralization, transparency, and security, and all web 3 products are built upon those three core values.

NFTs, the digital ownership form in Web 3.0 have changed the way users interact and Crazy Granny has paved the way by being a community-building project created with the goal of rewarding its investors through passive income and crypto investment opportunities.

Assets rarities and traits

Crazy Granny initial collection will contain 4000 non-fungible tokens (NFTs). Due to their limited supply, these assets are scarce and will increase in value as the project's adoption and popularity continues to rise and as we continue to build and deliver as per our Roadmap.

Further adding to the scarcity of these collectibles, Crazy Granny collection's initial supply has reduced by the fact that a portion of these assets are being used for collaborations with other communities, offered in giveaways and competitions and held by the team.

The unique element of this collections consists of the amount of traits used to design the collection, over 250.

Utility

Owning assets in the Crazy Granny ecosystem gives your access to an array of passive income opportunities. Within this ecosystem, users who take part will enjoy a wealth of both financial and value-driven benefits.

By staking your NFT you are eligible to win monthly prizes consisting of EGLD, Lkmex, Merch, Whitelist spots from future EGLD projects, EglD Airdrops, and Whitelist access in future collections

A further 20% discount will be applied when renting short-term in Sibiu from one of CG's nephew's properties

And lastly, 10% of the funds raised from the sale will be staked to participate at the lottery on Maiar Launchpad to invest in early stage crypto projects and all profits will be distributed back to CG holders.

Early adoption rewards

Crazy Granny collection is the first in a series that will be released as part of a wider project. As per our Roadmap we plan on launching a second collection: Jolie and a Play to Earn game that will feature both collections.

Being an early adopter to this collection means getting to build the community around you and benefiting directly from the network's growth. It also means getting to enjoy a wealth of benefits such as increased access to future drops.

We are even given airdrops and Whitelist spots to our early adopters and investors. All those who Whitelist and mint, will automatically receive Whitelist to our future Collection (Jolie)

Those who will mint 5 and above NFTs during Pre-sale will automatically receive NFT Airdrop from our next collection. Both categories will be included in a giveaway with 2 big prizes to be won: iPhone 13 & MacBook Pro

And lastly, those who will mint 3 NFTs and above during the Public sale will automatically receive Whitelist to our next Collection

Tokenomics

Roadmap

Q1 2022 - Completed

- NFTs design art
- Open Discord, Twitter, Telegram
- Launch Website
- NFT collection reveal
- The start of our marketing campaign
- Giveaways for the community

Q2 2022 - Completed

- Project launch
- Partnership announcements
- Additional benefits revealed to our NFT community
- Unveiling our NFT collection
- Media coverage campaign

Q3 2022 - In progress

- Pre-sale and Public sale Announcements
- Organize AMA sessions across Twitter, Telegram, and Discord
